**DETAILED ACTION**

***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102 (b) as being anticipated by Hmelar et. al., U.S.P. No. 5,729,643.

Hmelar et. al. 643' teaches an optical fiber component for changing spot sizes of optical fibers with different core diameters and method of making same comprising : a large diameter cored optical fiber 18 that is fusion spliced to a transition region fiber 50 in order to change spot sizes to a smaller core diameter fiber 20 by heating or fusion splicing with the fibers being either the same or different refractive indices wherein the optical fiber component can be used inside of a connector/ferrule structure, which clearly, fully meets Applicant's claimed limitations.
